<http://rjvv.com>

Ricardo Juárez works designing static and motion stuff from his studio Disismaineim <http://www.disismaineim.com>

He runs a free publication called New papers <http://new-papers.com> with artists' collaborations from all around the globe. It is not only a paper publication, each issue has a collection of experimental videos made or curated by Ricardo. <http://vimeo.com/newpapers>

Plain shapes, geometric and blobby movements, halftones and impossible figures are some things of what you will see in his sets.

Now they join forces to result a VJ set full of polygons and mathematic shapes living in oniric spaces. Pure colors mixed up with retro imagery of polyhedrons. Far constellations with cubist planets and hopeless calculations. Relax and enjoy.
